

1st. Pop up frame part way (short of the magnets touching) so there can be slack in the graphics. (see image to right)

To attach graphics to the frame see illustrations below.

It is best to start with the tabs on the top of the graphic.

1 Rotate cap counter-clockwise to remove cap from hub.

2 Insert silicon tab into hub

3 Insert cap into hub

4 Rotate cap clockwise to lock in place.

Finish. Pop up frame 100% so magnets come together and slack is eliminated from graphics.
