- Molded shipping cases available. Packs two SOLO per 42" x 30" x 8" case. Call to verify references & dimensions.

SOLO Curvo Post

Instructions

Step 1

Situate the base (D) at the desired location, stretch out the Tensaflex (E) and place it according to the guiding dots. Verify proper vertical direction.

Step 2

Put together the Velcro on the base with that on the Tensaflex. Leave one side slightly open.

Step 3

Place each of the shelves (B & C), starting with the lowest one, matching the guiding dots. Secure the velcro attachment.

Step 4

Place Top (A) starting with the guiding dots, firmly pressing the two shells of Velcro against each other. Adjust the Tensaflex so that all the Velcro lines are securely fastened.

Curvo Post

Step 5

Insert the lower part of the post (F1) through the countertop, and secure with the knob underneath the top. Insert the upper part of the post (F2) on F1.

Step 6

To assemble the shelves (H1), insert them vertically into the groove on the post, as shown in the picture, and then slide them to the horizontal position.

Locking Door

Detach the Tensaflex (A), two inches from each side. Place the door on the base, open the door and press the doorframe's Velcro against that on the Tensaflex.

To dismantle follow the same steps in reverse order.
